

# Digital Camera Club Meeting Resources

September 11th, 2015

1) Fraser Campbell recommended and John showed this video:

[http://www.bmyers.com/public/Before\\_you\\_share\\_photos\\_online.cfm](http://www.bmyers.com/public/Before_you_share_photos_online.cfm)

by Bill Myers on some of the security issues with geo-tagging shared images.

In the video, Bill used Irfanview, a program for displaying and manipulating many different image formats. It is highly recommended and is available here:

<http://www.irfanview.com/>

If you want to upload images that are geo-tagged make sure the web site you're uploading them to supports a geo-fence:

and set it up appropriately.
